

## Day to Day Care & Cleaning of your Carolina Classic Unit

- **Day-To-Day Cleaning**
  - Use warm water and an undiluted liquid detergent, Such as Mr. Clean, Lysol & Soft Scrub w/ Bleach.
- **For Stubborn Stains**
  - Use one of the powdered detergents, such as Spic & Span dry on a damp sponge. Solvents such as turpentine or paint thinner may be used sparingly. Scouring pads made of nylon, saran, or polyethylene and containing no abrasive may be used.
- **To Maintain Luster**
  - Apply an automotive type polishing compound such as DuPont No. 7 and a clean liquid wax, such as Johnson's J-Wax.
- **Caution**
  - Do not use abrasive scouring powders or metal scouring pads. The use of rubber or plastic mats is not recommended. If used, do not leave mat on tub bottom after use because of possible surface degradation.
- **Cleaning the lines & Jets to your whirlpool (using Cascade or another form of liquid dishwasher detergent)**
  - Fill the tub as if you were going to use it (hot water), then turn on the pump and slowly add the cleaning solution to the water. It's best if the solution is dissolved in the water. Run the pump 15-20 minutes. If you use bath oil beads on occasion you may want to make it a point to use the cleaning solution every 3 months to ensure that the unit stays clean & doesn't harbor any mold.
